PROFILE

I am a student in the School of Interactive Arts & Technology who is interested in animation and game design/development. As both a programmer and an artist, I aim to use my skills to create projects with both visual and functional appeal.

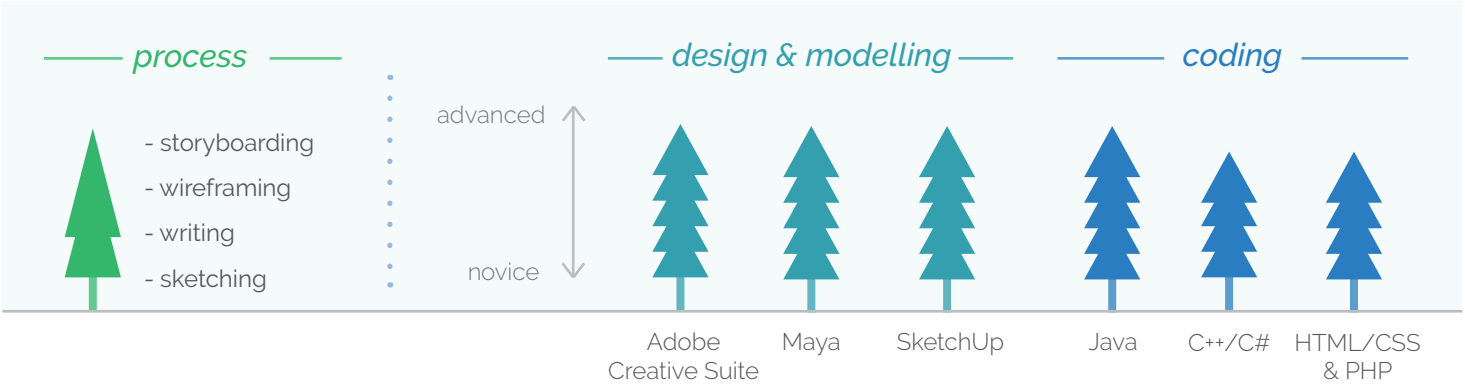
EDUCATION

Simon Fraser University — *Sept 2013 - present*

Interactive Arts & Technology, B.Sc

- Undergraduate Open Scholarship — Jan 2015, Sept 2015
  achieved a CGPA of 3.67 or higher
- Dean's Honour Roll — Fall 2014, Fall 2015
  achieved a GPA of 3.50 or higher while enrolled in at least 4 courses

SKILLS



ANIMATION & GAME DESIGN EXPERIENCE

Game Design
Academic Group Project
Jan - May 2017

Background:
- created a 3D action-adventure game in Unity about an alien capable of morphing and adapting to its environment
- showcased as part of the 2017 VanCAF Comic <3 Games Arcade

Contributions:
- concept planning, debugging and playtesting
- coded core and secondary game mechanics (morphing and targeting system, enemy AI, door and platform puzzles)
- implemented UI features and character animations

Game Design
Game Jam Entry
Nov 2016

Background:
- created a 2.5D horror game in Unity where the player tries to hide from a possessed doll while attempting to free it from possession
- created within 48hrs for Asylum Jam 2016; worked in a team of 5

Contributions:
- concept planning, debugging and playtesting
- coded basic character/camera controls and animations
- created scripts for altering the layering of furniture and items
- implemented UI features (instructions, start and game over screens)

3D Animated Short

Academic Group Project

Jan 2016 - Apr 2016

Background:
- created a 3 minute narrative animation about an astronaut and an alien cat on an extraterrestrial planet
- submitted to the 2016 Jalloo Animation Festival

Contributions:
- sketched environmental design concepts
- experimented with different rendering materials and layering passes
- 3D modelling and animation using Maya

WEB/APP DESIGN & DEVELOPMENT EXPERIENCE

Mobile App Design

Academic Group Project

July 2016 - Aug 2016

Background:
- created an application to help users keep track of their sleeping hours and habits with alarms, timers, and a log of hours slept

Contributions:
- coded alarm clock feature and designed its layout in Android Studio
- compiled other features coded by groupmates into a single application
- stored information from alarms and timers in a MySQLite database
- accessed database to create a list of hours slept

Web Design

Academic Project

May 2016 - Aug 2016

Background:
- created a website for comparing fundamental smartphone specifications for people unfamiliar with technical phone jargon

Contributions:
- used PHP and Apache webserver for the back-end
- stored and accessed information within a created MySQL database
- front-end coded with HTML and CSS with JavaScript and AJAX

VOLUNTEER EXPERIENCE

Dental Clinic Office Worker

Marine Dental Centre
Richmond, BC

July 2012 - Mar 2013

Tasks:
- prepared claim forms and filed patient documents
- created a poster to promote a “No Cavities Club” for children

Displayed:
- attention to detail & task efficiency
- problem solving and creativity to meet needs of the clientele

Teacher's Assistant

Hugh McRoberts Secondary
Richmond, BC

Dec 2011 - June 2012

Tasks:
- prepared classroom materials
- marked and filed assignments
- decorated classroom interior and bulletin boards

Displayed:
- attention to detail
- task efficiency

INTERESTS

Video Games
plotting the downfall of my enemies and releasing a whirlwind of button mashing mayhem

Music
playing instruments and unwinding while listening to soundtracks

Doodling
drawing short 2-4 panel comics and characters from games and cartoons
